ADVANCEMENTS FOR METAL BUILDINGS

# CONGRESS

**DARMSTADT 12. - 13. SEPT. 2022**

 European Association for  
Panels and Profiles

**IFBS**

The light metal construction method is a young and dynamic process. Modern requirements with regard to energy savings, environmental protection and standardization within the European Market require closer cooperation in order to meet today's challenges.

In order to achieve these aims, PPA-Europe, the European Association for Panels and Profiles and IFBS, the International Association for Metal Building Envelopes,

are working closely together. They complete each other in order to bring expertise on product quality, on adequate installation and on efficient advocacy at European level.

This congress will offer the participants the opportunity to operate in a network across the association borders, with the aim of both information exchange and building up new business partnerships. We have compiled a selection of subjects for you which include both current

information about manufacturing and sales of your products as well as prospects for their use. This year the focus is on the sustainable use of metal products and a sustainable metal building envelope.

We are pleased to invite all those interested to this congress. Participation does not require membership.

**We are looking forward to greeting you in Darmstadt!**
